A Super High Gain Quad-style beam antenna for 28Mhz

Description

A 2 element 28-29MHz (600Khz sections) LFA-Q Quad-style beam antenna - **Second Generation LFA Yagi !**

The G0KSC LFA-Q beam antenna provides a new slant on the proven quad style beam antenna. The LFA-Q is a super-strong, super-rigid Quad which provides very high levels of gain for it's size, while at the same time maximising all round performance. Hard to beat with a direct 50 Ohm feedpoint and no matching losses and suppression of unwanted noise due to the closed loop system.

The LFA-Q deploys 2 x 1.25" square booms one at the top of the structure and one at the bottom which enable the antenna to be ultra-rigid and stand up to extreme weather conditions such as severe ice and wind loading.

This 2 element LFA-Q is an excellent option if you do not have space, **especially stacked !! 2 at just 7m spacing provides 15.23dBi (when placed 10m above ground)!!**

NOTE: With all our HF antennas we can custom design your element taper and element size requirements in order to cater for all weather and installation requirements. 28MHz Quad antenna - High Gain & Performance

Performance

Gain: 6.94dBi @ 28.4MHz

F/B: 21.08dB @ 28.4MHz

Peak Gain: 7.05dBi

Gain at 10m above Ground: 13.15dBi

Peak F/B: 24.83dB

Power Rating: 15kw+

SWR: Below 1.5:1 from 28.200MHz to 28.600MHz **(Can be adjusted for CW, SSB or mixture of both)**

Stacking Distance: 6.5-10m (9m recommended)

2 Stacked Gain @ 9m spacing: 10.28dBi

2 Stacked F/B: 18.75dBi

2 Stacked Gain @ 5.5m Spacing 10m above ground: 12.11dBi

Boom Length: 0.72m

Weight: 4.57KG / 10.1LB

Turning Radius: 2.75m / 9ft

Wind Loading: 0.27 Square Metres / 2.86 Square feet

Wind Survival: 184KPH / 115MPH

Other options available if higher wind loading/survival is required.

Customer comment on the LFA-Q:

"Very nice...assembled and installed over the last two days - even though it arrived over night!

Performs extremely well - It replaced a MET 144 8T
