High capacity (500w)power supply unit for multiple rotators

## Description

**Model: SPID SP01 Rotator Controller via Ethernet**

**If purchasing outside of the EU (or with a valid EU VAT Number) costs are excluding VAT. The price for this item outside of Europe is £416.95**

The PS-01 power supply is suitable for the Big RAS/RAK & HR with the MD-01 control unit. The power supply provides 2 different voltages (15V for the controller / 24V for the rotator). At this power supply, due to the generous dimensions of the output power (500W) may also be more like 1 controller/rotator operated.

The power supply has several protection circuits. Among other factors, a temperature of 50° starts additional fans for optimum cooling. A protection circuit against over-voltage is also integrated. The power supply unit is supplied complete with connectors.
